

RUTGERS | CODING BOOTCAMP

Session 11.2 - Javascript Constructors

Javascript Constructors

Objectives

- Students will use constructor functions to structure objects and solve problems in a DRY way
- Interview questions!

Constructors

- A constructor is useful when you want to create multiple similar objects with the same properties and methods. It's a convention to capitalize the name of constructors to distinguish them from regular functions.

So what is NodeJS?

Node.js is an open-source, cross-platform JavaScript runtime environment designed to be run outside of browsers.

It is a general utility that can be used for a variety of purposes including asset compilation, scripting, monitoring, and most notably as the basis for web servers

Podcast of the Week

Shop Talk Show

An internet radio show about the internet starring Dave Rupert and Chris Coyier.
